'KNOW-IT-ALL' Programme

The 'KNOW-IT-ALL' Programme of Clear tube equipment from Groz makes you 100% sure of what you are dispensing; ensuring you don't make costly mistakes that cannot be reversed.

Different equipment, machines, bearings and vehicles require different types of lubricants. Proper identification of the lubricant once installed in the equipment can be challenging.

An estimated 60% of bearing failures all over the world are due to lubricant cross contamination. This leads to costly downtime & expensive machinery repairs.
