EVOLVE 200 PULSE

NEXT GENERATION PULSE MIG

MIG • TIG • MMA

INNOVATIVE USER INTERFACE

Designed to take the stress out of dialling in the perfect settings for any job, the EVOLVE 200 Pulse leads the way in the ease of use stakes.

5" LCD TOUCH SCREEN – Make adjustments on the fly with an intuitive, simple to use screen. So simple it almost makes reading the manual optional.

FULLY SYNERGIC PROGRAMS – Just select your metal type, wire size and shielding gas then turn the machine up & down, the EVOLVE 200 Pulse takes care of the rest with programs developed right here in NZ.

PULSE MIG – SINGLE & DOUBLE PULSE

Pulse welding with the EVOLVE 200 Pulse reduces heat input into the workpiece and minimises spatter while offering faster weld speeds and enhanced penetration. Pulse welding is perfect for thin sections and softer materials, particularly aluminium.

SINGLE PULSE – Alternates between a peak current and a background current.

DOUBLE PULSE – Uses a second background current level to enhance control over the arc.

Pulse MIG Welding delivers a finished weld appearance similar to a quality TIG Weld but with significantly faster speeds, lower cost and while virtually eliminating clean up time with an incredible reduction in weld spatter.

SMART APP VIA BLUETOOTH™

The EVOLVE 200 Pulse offers smart device connection via Bluetooth™. The EVOLVE smart app is stacked with features and benefits, including the option not to use it if desired.

FUTURE-PROOFED

The EVOLVE 200 Pulse offers the ability to connect a SPOOL GUN or PUSH-PULL GUN to further enhance the MIG Welding experience by extending torch reach and allowing for use of smaller diameter wires, even in PULSE MODE.

ENHANCED DC TIG FUNCTION

The EVOLVE 200 Pulse offers a new level of multi-function ability with the inclusion of HF-START and GAS SOLENOID operation on the DC-TIG function.

WELD SEQUENCE CONTROLS – Easily adjust your pre and post-flow gas, up and down-slope settings all via the 5" LCD touch screen or smart device (with app).

PULSE TIG – Raise the bar with the ability to select & adjust pulse settings in DC-TIG. Ideal for out of position welding and increasing weld speeds.

MULTIPLE AC WAVE FORMS - MIX ARC WAVE FORM (AC+DC)

AC SQUARE WAVE: Allows the current to switch from electrode + to electrode - very quickly. This produces high voltage as the current switches polarities allowing the arc to restart easily. The arc can be maintained without the use of high-frequency, the fast transition provides for responsive, dynamic & focused arc for better control.

TRIANGLE WAVE: Characterised by a particularly soft and concentrated arc combining the effect of peak amperage while reducing overall heat input. Leads to quick puddle formation and because of lowered heat input reduces weld distortion especially on thin material. This wave form is ideal for very precise welding of thin aluminum plate.

AC SINE WAVE: It is the standard Wave form, characterised by low noise and excellent arc control, it also gives the soft-arc feel of a conventional power source, while using square transitions to eliminate the need for continuous HF.

AC MIX ARC: This function of MIX AC/DC makes it possible to modulate the welding current, alternating a period of TIG AC with a period of TIG DC-. The efficiency of AC TIG welding can be combined with the high penetration of DC TIG welding, obtaining higher welding speeds and establishing the weld puddle quicker on cold workpieces. Ideal for welding heavier gauge material with less current than AC welding.

TIG TORCH QUARTZ NOZZLES UPGRADE YOUR ARC T2 OR T3 TIG TORCH TRANSPARENT & DURABLE

Improve your TIG welds by simply increasing your visibility of the weld puddle. Simply replace the Heat Zone Isolator fitted to your T2 or T3 Tig Torch and choose the Quartz Nozzle size to suit your work. More durable than Pyrex, these new Quartz Nozzles will allow you to see what you're welding like nothing you've seen.

PYREX GAS LENS KITS INCREASE YOUR TIG WELDING VISIBILITY

Pyrex gas lens nozzles are ideal for TIG welding applications with limited visibility, such as in and around tubing and pipe as well as inside corners and bends. Pyrex gas lens nozzles also allow reduced shielding gas consumption, with savings of up to 40% compared to using traditional parts. The tungsten adaptor with replaceable mesh screen ensures a consistent gas flow pattern and allows the tungsten electrode to be extended up to six times the electrode diameter.

ESB40 - E7016 BASIC LOW HYDROGEN ELECTRODE

Suitable for repair welding on difficult to weld steels, welding of steels with unknown composition. Produces high tensile strength weld metal with excellent toughness values making this electrode suitable for welding restrained structural members and large weld cross sections. Also preferred for buffer layer applications on steels before hardfacing and for welding of cast irons with high preheat. Welds are of X-ray quality.

ELIPSE® HALF-MASK P2 RESPIRATOR

The Elipse® Half-Mask P2 Respirator combines a particulate filter with an activated carbon cloth to provide a minimum 99.95% filtration against odours, dust, all types of fumes, oil and water mists and micro-organisms. It is designed to fit under most welding helmets and welding masks.

- Approved to AS/NZS 1716:2012 as a P2 Reusable Respirator, as the P3 filters are fitted on Half Mask.
- Latex and silicone-free, lightweight TPE face piece that is comfortable to wear for long periods of time.
- Low profile filters provide an unobstructed view.
- Compatible with other PPE safety products including visors and welding helmets.

WARNING! WORKSAFE NEW ZEALAND

Prolonged exposure to welding fumes is a serious hazard to workers respiratory health.

Welding and hot cutting produce metal and fluxing fumes made up of toxic gases and very fine particles. Inhaling welding fumes can cause ill health.
